- the invention disclosed and claimed in U.S. Application Serial No. 15/863,150, entitled “Temperature and Pressure Sensors and Methods”, filed on January 5, 2018, and
- any and all U.S. patent applications and U.S. patents based on said disclosures and patents, including all divisions, continuations, continuations-in-part (only to the extent that such claims are fully supported by another patent or application in the patent filed), and national stage applications reentering U.S. from a Patent Cooperation Treaty application having at least one INVENTOR of the AIR FORCE and at least one INVENTOR of FSURF, and reissues or extensions.

Acting Air Force Federal Register Liaison Officer.
